

YEE SEN LEE-WOLFE

Senior Landscape Architect

Ms. Lee-Wolfe brings to Lee-Wolfe & Associates over twenty years of Middle East landscape architectural experience. She worked extensively on major capital projects in that region while with the Bechtel Group of Companies in San Francisco, California, and later as owner principal of a consulting firm specializing in Middle East landscaping.

Ms. Lee-Wolfe has devoted nearly 40 years to the full complement of landscape architectural design practice and has hands-on experience in all phases of project development, including project design startup, design development, construction drawings and specifications, construction support, and technical report writing. She has translated her firsthand experience with large-scale projects into effective project organization and coordination, thorough preparation of construction documents, and well-organized and concise written reports. She brings to projects her research ability through her education in library science.

Having had many years of experience with projects in temperate, tropical and arid regions of the world, Ms. Lee-Wolfe is a specialist in landscape developments in diverse climate zones, with a special focus on Middle East landscaping. Having overseen the production of construction documents for numerous projects in Saudi Arabia, Kuwait and Dubai, she has acquired a strong foundation to manage the multi-disciplinary coordination and the execution of such projects.

REPRESENTATIVE PROJECTS

Yamama Palace for Prince Abdul Aziz bin Fahd, Riyadh, Saudi Arabia

Provided technical offshore support for the construction of the 20-hectare (49-acre) exterior landscaping and lighting project for the palace of a member of the royal family.

Magic World Theme Park Nursery & Demonstration Garden, Dubai, UAE

Assisted with site planning of the theme park reception center and demonstration garden and developed technical specifications for the construction document package.

King Khaled International Airport, Riyadh, Saudi Arabia

Supervised production of construction documents for landscaping development for terminal, operations and support facilities, for 567 hectares (1,400 acres) of development areas of King Khaled International Airport for Bechtel Group Inc. in the capital city.

King Fahd International Airport, Dammam, Saudi Arabia

Prepared Preliminary and Final Design Reports for landscaping and irrigation for 850 hectares (2,100 acres) of airport development areas and 158 hectares (390 acres) of residential community development at King Fahd International Airport for Bechtel Group Inc. in Dammam, Saudi Arabia.

Kuwait National Greenery, National Nursery & Botanical Garden, Kuwait

Designed the conceptual site plan for the botanical garden within the Nursery Complex, a facility for cultivating plants for the national green belt and revegetation program. Also developed the landscape and irrigation standards for the project.

American Society of Landscape
Architects

Dubai International Airport Expansion, Dubai, United Arab Emirates

Oversaw the development of construction drawings and prepared the technical specifications for the landscaping associated with the first expansion of the international airport.

El Monumento, Baja California, Mexico

Wrote the conceptual planning and design text for the marketing portfolio book for the master plan of the 1,720-acre new community situated on a mesa and canyons overlooking the Pacific Ocean.

Salsipuedes Master Plan, Baja California, Mexico

Wrote and edited the conceptual planning and design text for the marketing portfolio book for the 350-hectare (864-acre) resort style residential and mixed-use community located at the historic Salsipuedes surf break near Ensenada. Edited final presentation graphics.

Trilogy at the Vineyards, Brentwood, CA

Provided project management services for the Trilogy at the Vineyards Club, Tour Center, Models and a quarter mile club drive with median and parkway; oversaw preparation of construction documents and developed technical specifications for these facilities. The Club recreation program includes tennis courts, bocce ball courts, outdoor pool and spa, terraced and theme gardens. Served as main client and consultant liaison.

Rice Ranch Community Park, Orcutt, CA

Project manager for the 26 acre community park that integrates the park development into the natural oak studded canyon and creek and adjacent mitigation zones with native plant material. Oversaw the preparation of working drawings and developed the technical specifications, and currently providing on-going construction support services. The park program provides active and passive recreational opportunities that include a vista point, two baseball fields, a soccer field, children's playground, trail staging area, two dog parks and group and individual picnic areas.
